<p>Service package for an audit mission related to WALLIX Bastion and Access Manager configuration, covering:</p> <ul style="list-style-type: none"> <li>- Architecture : design, sizing, high availability</li> <li>- System: retention, backup, monitoring</li> <li>- Configuration : users, resources, accounts</li> <li>- Security: authentication &amp; connexion policies</li> </ul> <p>Deliverable is a report with a set of findings and recommendations.  *1 full day is spent with the Customer. A meeting is held at delivery for presenting results.</p>	PS_P_AUD	\$ 4.875,00	Subscription

Service package for the integration of the WALLIX PAM solutions. This package applies to systems with a maximum of 500 resources and 50 users.  
It includes the integration of one cluster of Bastion and one cluster of Access Manager into the Customer's infrastructure, each cluster being made of two instances configured in Active/Active High Availability setup. The WALLIX solutions are connected to Active Directory for user and group provisioning and authentication.

Key PAM functions covered by this package include:

- Native- and web-based ssh and RDP remote accesses,
- Access control,
- Traceability,
- Approval management.

Exclusions:

- Access to web and fat client applications
- Password rotation scenarios
- Setup of MFA for Bastion or Access Manager

Delivered Platform:

- One cluster of two Bastion instances, integrated in the Customer's information system
- One cluster of two Access Manager, integrated in the Customer's information system

Delivered Documentation:

- Architecture Description covering how the WALLIX Solutions are integrated into the Customer's Information System
- Operation Plan, covering run activities
